Burglary Protection Solution

ROTARY DEPOSIT HEAD

Certified Burglary-Resistance

- A2P (CNPP)
Grades I E - IV E

DFX

Burglary Protection Solution

Office, banks and retail outlets often receive cash and valuables which need to be deposited swiftly and safely with the minimum of inconvenience. That is why Fichet-Bauche has created DFX – a range of rotary deposit heads enabling you to quickly make deposits into a burglary-resistant safe without having to open the safe door.

Did you know?

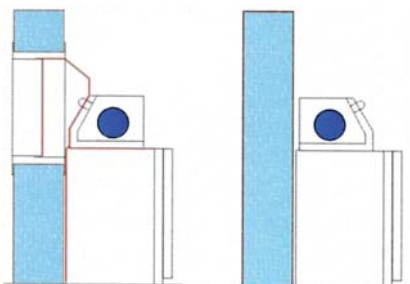

Most deposit heads offer a lower level of protection in comparison with the safe onto which it is mounted.

Product Overview

The DFX deposit head can be placed on top of several Fichet-Bauche safes.

Safe Options	Certified Burglary Resistance
Carena	Grades I E, II E, III E (ECB•S) and A2P (CNPP)
Millium	Grades I E, II E, III E (ECB•S) and A2P (CNPP)
Gold	Grade IV E (ECB•S) and A2P (CNPP)

Since the deposit head can be located towards either the front or the back of the safe, DFX can be installed as a free-standing safe or through-the-wall in a self-service area.

Burglary Protection

In order to offer the same level of protection as the safe on which it is fitted, the DFX deposit head also has A2P approval from CNPP for Grades I E - IV E. This makes DFX one of the few systems which has a deposit head offering equally as much burglary resistance as the safe itself.

Technical Specifications

Dimensions (mm)	Height	Width	Depth
Deposit Rotary Head	329	590	400

Locking

The deposit drum is operated from the front of the head, using either an MxB key or an electro-mechanical system.

The MxB – level B/E – is a high-security mechanical lock. Its innovative shape and design, which allows for 10 million different possible keys, make replication extremely difficult.

Deposit Types

DFX is designed to accept deposits made in the following formats (all sold separately):

- Fichet-Bauche security envelopes
- Fichet-Bauche DJN cassettes
- Fichet-Bauche R2 cassettes
- Fichet-Bauche A4 envelopes (paper or plastic)

Any other envelope formats must be approved first by Fichet-Bauche.

The optional deposit bag enables you to easily retrieve deposits made into the safe. Thanks to its self-locking system activated during extraction, an individual can collect the deposited items without the need for a controlled opening procedure.

Fichet-Bauche Guarantee

Fichet-Bauche products are designed and manufactured in accordance with the ISO 9001 standard for Quality Management Systems and ISO 14000 for Environmental Management Systems.
